The below results are based upon the Mississippi Assessment Program (MAP) ELA assessments (including the state's alternate assessment) in grades 3-8 and high school. The MAP assessment replaced the PARCC assessment. The MAP assessment is aligned to the Mississippi College and Career Readiness Standards. The MAP performance levels were first established in June 2016 based upon statewide data and educator input.

Science
The below results are based upon The Mississippi Science Test, Second Edition (MST2) and the Biology I test. MST2 is an assessment (including the state's alternate assessment) administered to students in grades 5 and 8 and measures student achievement in science based upon the 2010 Mississippi Science Framework (or Mississippi Extended Science Framework). In high school, the Biology I assessment is a measure of student achievement and is also based on the 2010 Mississippi Science Frameworks.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT <br> 2-YEAR TREND: English-language arts

The below results are based upon both MAP and PARCC assessment results reported in 2016 and 2015, respectively, for students scoring Proficient or Advanced (i.e., Level 4 or Level 5) in ELA. The MAP and PARCC results are provided because comparisons between the two assessments are technically supported; however, some unique features (i.e., scaling) of each assessment must be taken into consideration. Further, although both assessments have similar test specification, item difficulty, and other technical properties, implementation issues associated with PARCC in 2015 confounded the results in some individual cases.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT 2-YEAR TREND: Science

The below results are exclusively MST and Biology assessment results reported in 2016 and 2015 for students scoring either Advanced or Proficient. The MST and Biology measure the same abilities and skills, used the same content frameworks, item types, and other test specifications. Additionally, the scales and performance levels were established under similar technical specifications that do lend themselves to similar inferences about student achievement. In other words, a direct comparison of the assessment results as required by Section $1111(\mathrm{~h})(1)(\mathrm{C})(\mathrm{iv})$ is appropriate and informative to Mississippi stakeholders.

The below results are based upon the National Assessment of Educational Progress (NAEP) 2015 scores on subject-matter achievement tests. NAEP does not provide scores for individual students, schools, or school districts. NAEP results are based on representative samples of students in grades 4 and 8 . The NAEP is administered every two years.

## SECTION V: ADDITIONAL FEDERAL REPORTING GRADUATION RATE SUBGROUPS

The below results are provided to show the percentage of students graduating from high school in four years disaggregated by subpopulations of students. All graduation rates listed below are lagged one year. The data below are based upon the 2011-12 grade 9 student cohort that graduated with a standard diploma during SY 2014-15, which in turn is reported a year later within this section of the Annual Report Card.

## Science

The below results are based upon The Mississippi Science Test, Second Edition (MST2) and the Biology I test. MST2 is an assessment (including the state's alternate assessment) administered to students in grades 5 and 8 and measures student achievement in science based upon the 2010 Mississippi Science Framework (or Mississippi Extended Science Framework). In high school, the Biology I assessment is a measure of student achievement and is also based on the 2010 Mississippi Science Frameworks.

The below results are based upon both MAP and PARCC assessment results reported in 2016 and 2015, respectively, for students scoring Proficient or Advanced (i.e., Level 4 or Level 5) in ELA. The MAP and PARCC results are provided because comparisons between the two assessments are technically supported; however, some unique features (i.e., scaling) of each assessment must be taken into consideration. Further, although both assessments have similar test specification, item difficulty, and other technical properties, implementation issues associated with PARCC in 2015 confounded the results in some individual cases.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT 2-YEAR TREND: Science

The below results are exclusively MST and Biology assessment results reported in 2016 and 2015 for students scoring either Advanced or Proficient. The MST and Biology measure the same abilities and skills, used the same content frameworks, item types, and other test specifications. Additionally, the scales and performance levels were established under similar technical specifications that do lend themselves to similar inferences about student achievement. In other words, a direct comparison of the assessment results as required by Section $1111(\mathrm{~h})(1)(\mathrm{C})(\mathrm{iv})$ is appropriate and informative to Mississippi stakeholders.

## Science

The below results are based upon The Mississippi Science Test, Second Edition (MST2) and the Biology I test. MST2 is an assessment (including the state's alternate assessment) administered to students in grades 5 and 8 and measures student achievement in science based upon the 2010 Mississippi Science Framework (or Mississippi Extended Science Framework). In high school, the Biology I assessment is a measure of student achievement and is also based on the 2010 Mississippi Science Frameworks.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT <br> 2-YEAR TREND: English-language arts

The below results are based upon both MAP and PARCC assessment results reported in 2016 and 2015, respectively, for students scoring Proficient or Advanced (i.e., Level 4 or Level 5) in ELA. The MAP and PARCC results are provided because comparisons between the two assessments are technically supported; however, some unique features (i.e., scaling) of each assessment must be taken into consideration. Further, although both assessments have similar test specification, item difficulty, and other technical properties, implementation issues associated with PARCC in 2015 confounded the results in some individual cases.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT 2-YEAR TREND: Science

The below results are exclusively MST and Biology assessment results reported in 2016 and 2015 for students scoring either Advanced or Proficient. The MST and Biology measure the same abilities and skills, used the same content frameworks, item types, and other test specifications. Additionally, the scales and performance levels were established under similar technical specifications that do lend themselves to similar inferences about student achievement. In other words, a direct comparison of the assessment results as required by Section $1111(\mathrm{~h})(1)(\mathrm{C})(\mathrm{iv})$ is appropriate and informative to Mississippi stakeholders.

## SECTION V: NATIONAL ASSESSMENT OF EDUCATIONAL PROGRESS 2015 Results

The below results are based upon the National Assessment of Educational Progress (NAEP) 2015 scores on subject-matter achievement tests. NAEP does not provide scores for individual students, schools, or school districts. NAEP results are based on representative samples of students in grades 4 and 8 . The NAEP is administered every two years.

## SECTION V: ADDITIONAL FEDERAL REPORTING GRADUATION RATE SUBGROUPS

The below results are provided to show the percentage of students graduating from high school in four years disaggregated by subpopulations of students. All graduation rates listed below are lagged one year. The data below are based upon the 2011-12 grade 9 student cohort that graduated with a standard diploma during SY 2014-15, which in turn is reported a year later within this section of the Annual Report Card.

| The Mississippi Statewide Accountability System is a single "A" through " F " school and district accountability system based on the requirements of Mississippi Code 37-17-6 and the federal Elementary and Secondary Education Act of 1965 (ESEA). The accountability system assigns performance classifications based on: (a) student achievement, (b) student growth, (c) graduation rates, (d) participation rate, and (e) other outcome measures. |  |  |  |  |  |

## SECTION III: SCHOOLWIDE ASSESSMENTS

Mathematics
The below results are based upon the Mississippi Assessment Program (MAP) mathematics assessments (including the state's alternate assessment) in grades 3-8 and high school. The MAP assessment replaced the PARCC assessment. The MAP assessment is aligned to the Mississippi College and Career Readiness Standards. The MAP performance levels were first established in June 2016 based upon statewide data and educator input.

Science
The below results are based upon The Mississippi Science Test, Second Edition (MST2) and the Biology I test. MST2 is an assessment (including the state's alternate assessment) administered to students in grades 5 and 8 and measures student achievement in science based upon the 2010 Mississippi Science Framework (or Mississippi Extended Science Framework). In high school, the Biology I assessment is a measure of student achievement and is also based on the 2010 Mississippi Science Frameworks.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT <br> 2-YEAR TREND: English-language arts

The below results are based upon both MAP and PARCC assessment results reported in 2016 and 2015, respectively, for students scoring Proficient or Advanced (i.e., Level 4 or Level 5) in ELA. The MAP and PARCC results are provided because comparisons between the two assessments are technically supported; however, some unique features (i.e., scaling) of each assessment must be taken into consideration. Further, although both assessments have similar test specification, item difficulty, and other technical properties, implementation issues associated with PARCC in 2015 confounded the results in some individual cases.

## SECTION IV: SCHOOLWIDE ACHIEVEMENT 2-YEAR TREND: Science

The below results are exclusively MST and Biology assessment results reported in 2016 and 2015 for students scoring either Advanced or Proficient. The MST and Biology measure the same abilities and skills, used the same content frameworks, item types, and other test specifications. Additionally, the scales and performance levels were established under similar technical specifications that do lend themselves to similar inferences about student achievement. In other words, a direct comparison of the assessment results as required by Section $1111(\mathrm{~h})(1)(\mathrm{C})(\mathrm{iv})$ is appropriate and informative to Mississippi stakeholders.

## SECTION V: NATIONAL ASSESSMENT OF EDUCATIONAL PROGRESS 2015 Results

The below results are based upon the National Assessment of Educational Progress (NAEP) 2015 scores on subject-matter achievement tests. NAEP does not provide scores for individual students, schools, or school districts. NAEP results are based on representative samples of students in grades 4 and 8 . The NAEP is administered every two years.

## SECTION V: ADDITIONAL FEDERAL REPORTING GRADUATION RATE SUBGROUPS

The below results are provided to show the percentage of students graduating from high school in four years disaggregated by subpopulations of students. All graduation rates listed below are lagged one year. The data below are based upon the 2011-12 grade 9 student cohort that graduated with a standard diploma during SY 2014-15, which in turn is reported a year later within this section of the Annual Report Card.
